

QQ Assessment Solution

Quality Questions for
Quality Education

Who We Are?

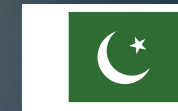

QQ, a subsidiary of Innovative Technology Company (Innotech), a leading innovator in the field of e-learning, and assessment systems, dedicated to revolutionizing the way we assess knowledge and skills.

Founded by Saudi experts with a unique blend of expertise in technology and education, Innotech has established itself as a pioneer in developing innovative assessment solutions.

Mission & Vision

Inspired by the aspirations of the Kingdom's Vision 2030, we envision a future where world-class assessment systems, crafted by Saudi expertise, shape education. These systems empower personalized learning through powerful insights and data, unlocking the full potential of every student.

Our Team

Our team of 125 employees, including software developers, educational assessment experts, data analysts, and content creators are driven by a single mission: **creating ground-breaking solutions to empower educators and unlock student potential.**

Our Locations

HQ: Riyadh, Saudi arabia
Cairo, Egypt
Pakistan
London, UK

The Team

United by a shared vision, we empower our team to grow and succeed. We offer support, development, and encouragement, unlocking their full potential and celebrating our achievements together.

13 Strategic Reasons to use QQ Platform

13 Strategic Reasons to use QQ Platform

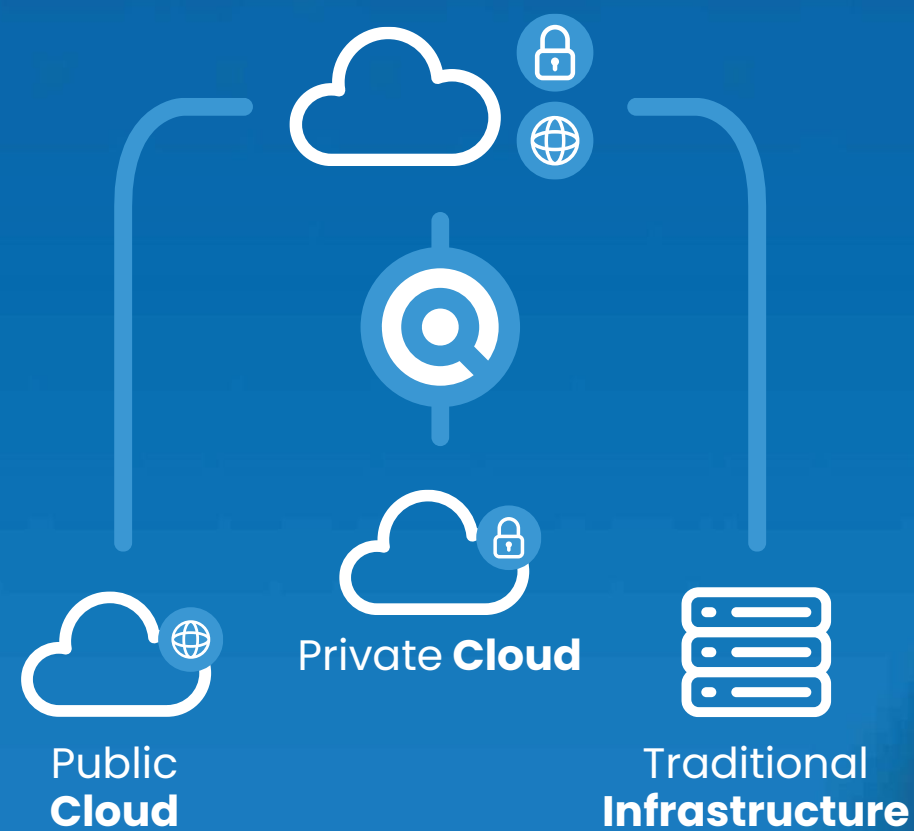

What Exactly QQ Offer?

QQ is a robust and comprehensive platform that contains a set of modules responsible for managing the full cycle of assessment and integrating with other educational and administrative systems.

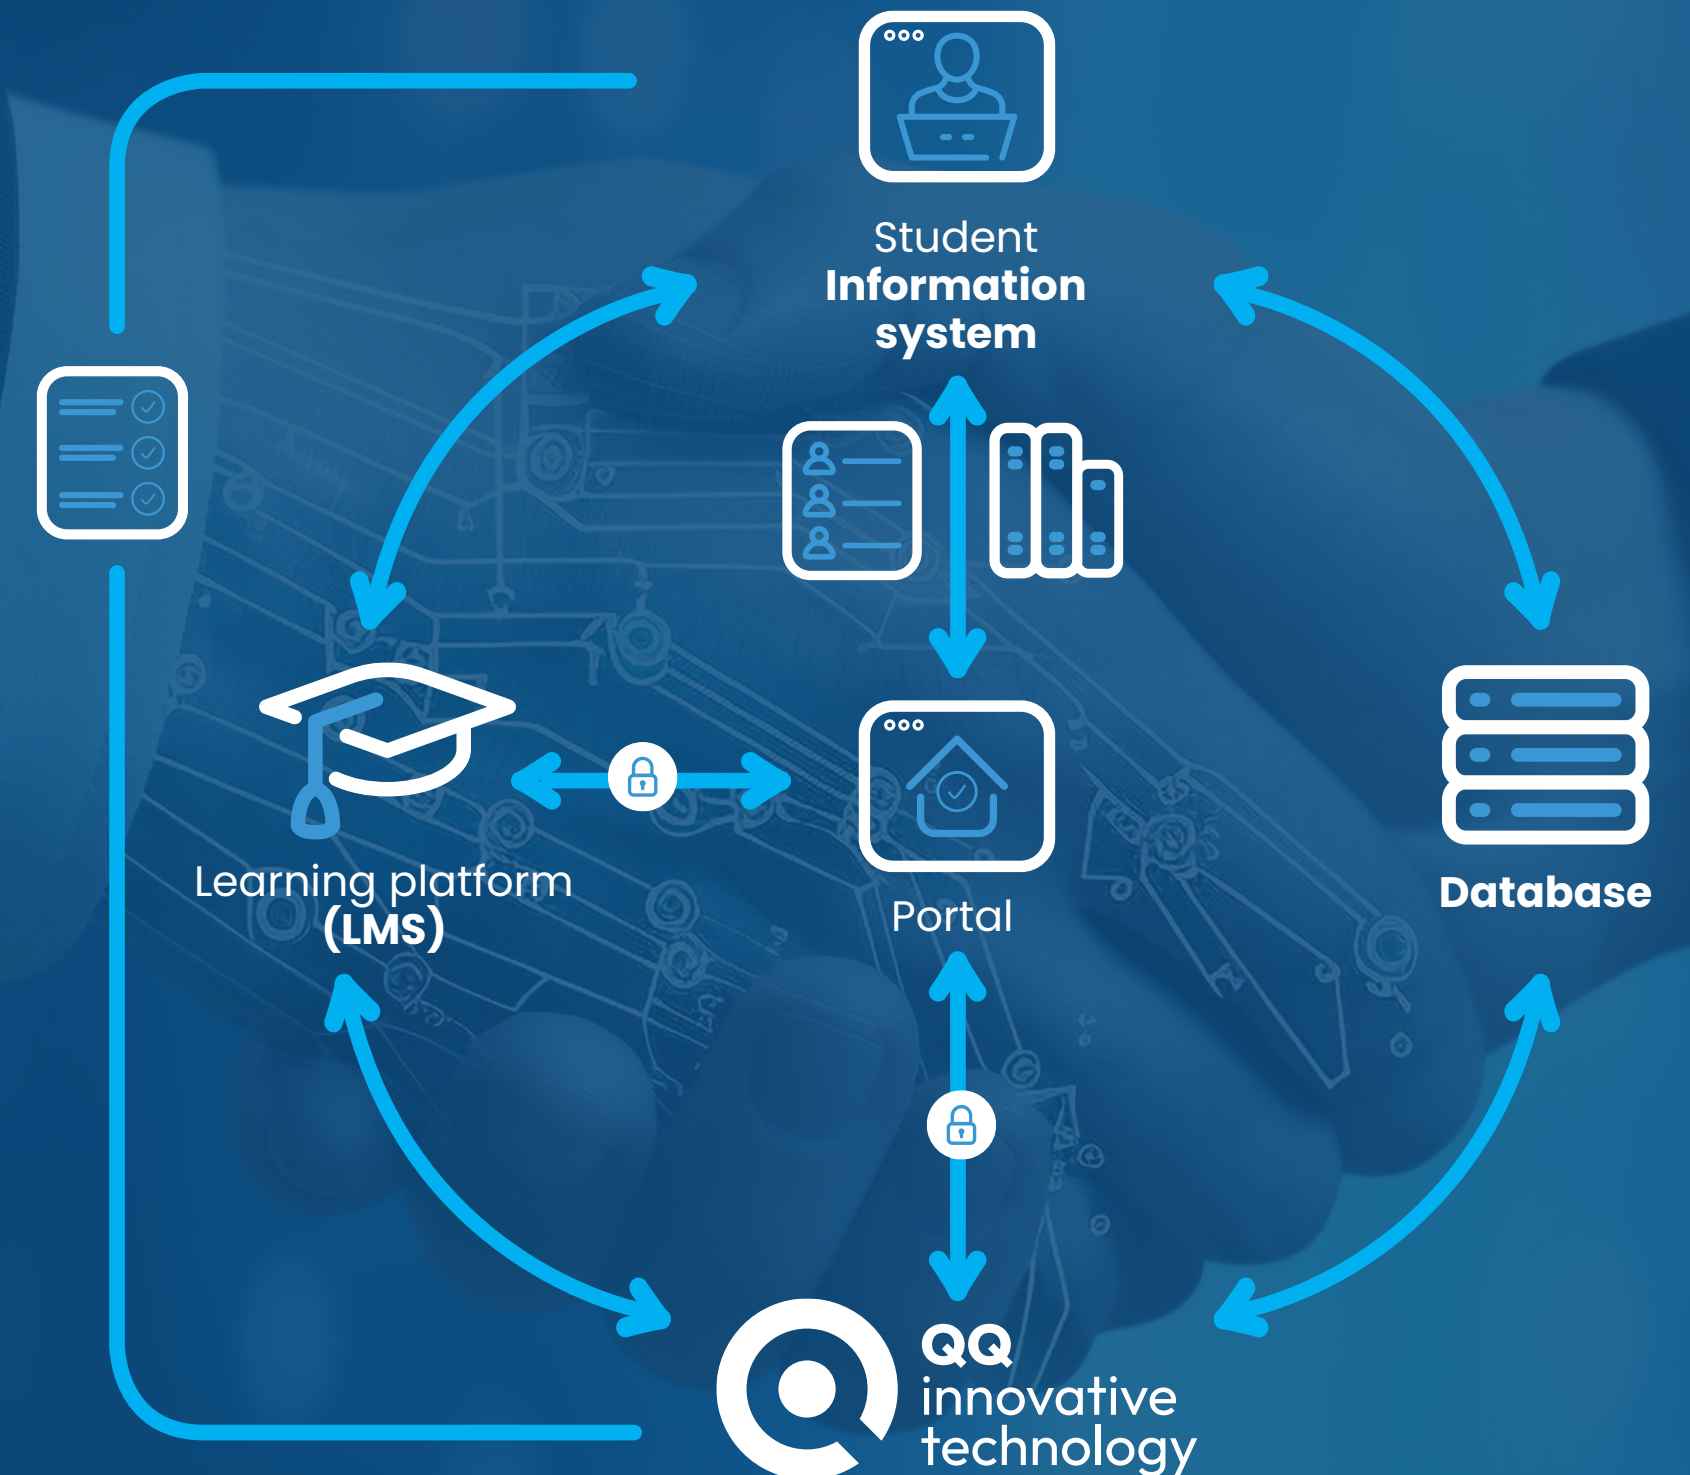

Hosting

We understand that our customers have different hosting preferences, and we offer a variety of options to accommodate their needs. You can choose to host our assessment software on our secure cloud services, within your own datacenter, or through trusted cloud hosting providers like AWS, Google, or MS Azure. We give you the flexibility to select the hosting setup that best suits your organization's resources and goals. Our top priority is to deliver dependable and efficient hosting services, ensuring that your assessment software runs smoothly, no matter which hosting environment you chose.

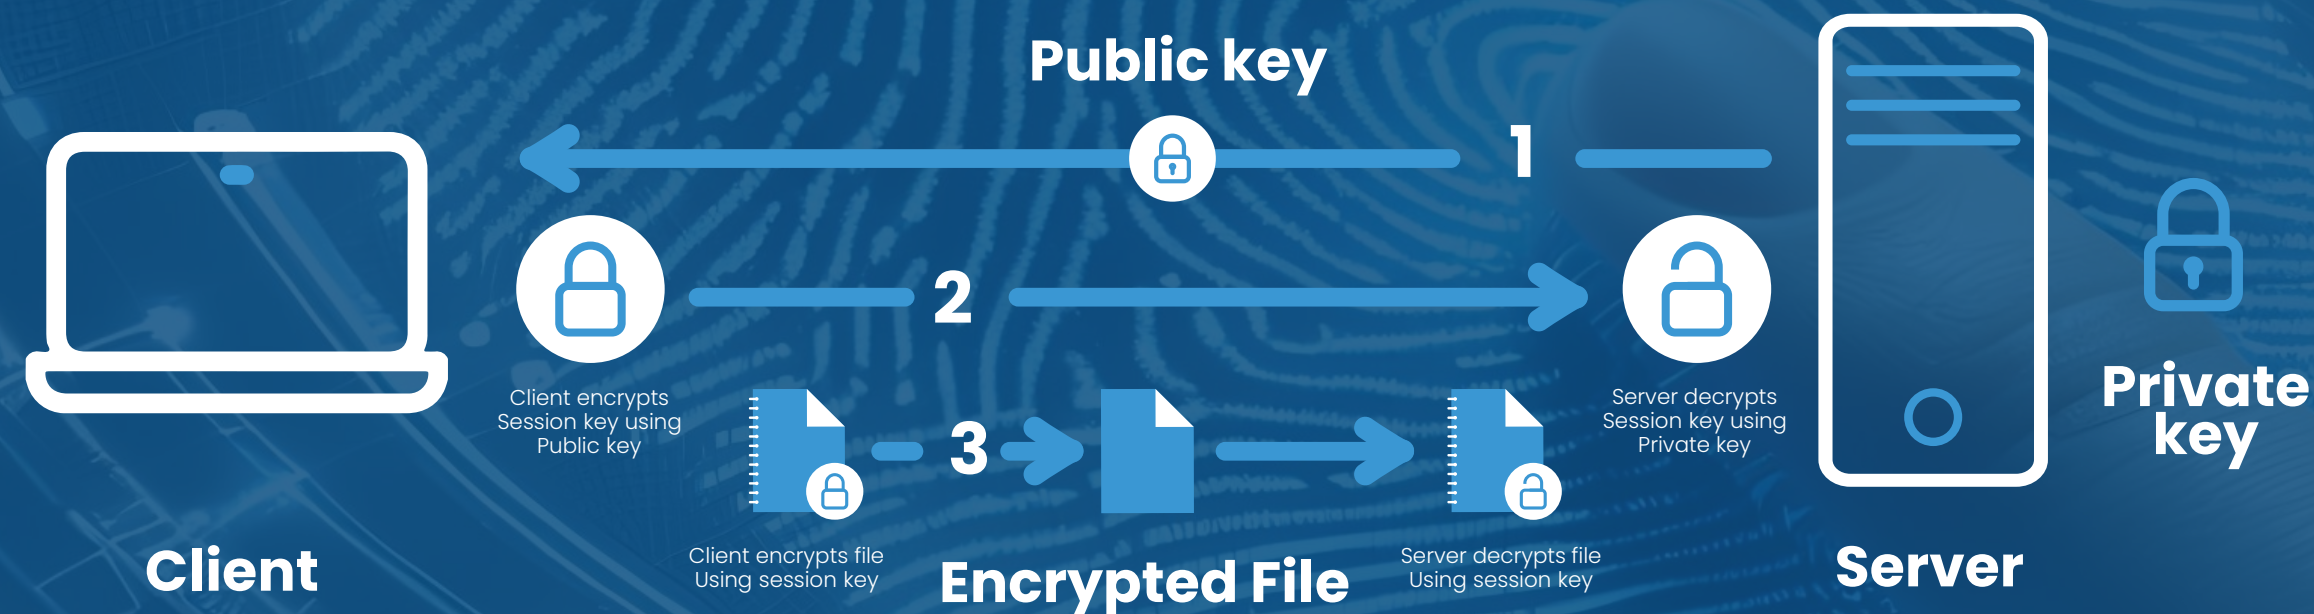

Integrability

QQ® is designed to seamlessly integrate with other systems, providing enhanced functionality and streamlining processes. We offer multiple methods of integrability to ensure compatibility with a wide range of systems and platforms. Whether you need to integrate with learning management systems (LMS), student information systems (SIS), or other third-party applications, we have you covered. Our software supports various integration methods such as API-based integrations, single sign-on (SSO), and data exchange protocols. This allows for smooth data transfer, real-time synchronization, and efficient workflows between different systems. We understand the importance of interconnectedness and offer flexible integrability options to ensure our software seamlessly fits into your existing technology ecosystem, saving you time and effort while maximizing the value of your integrated systems.

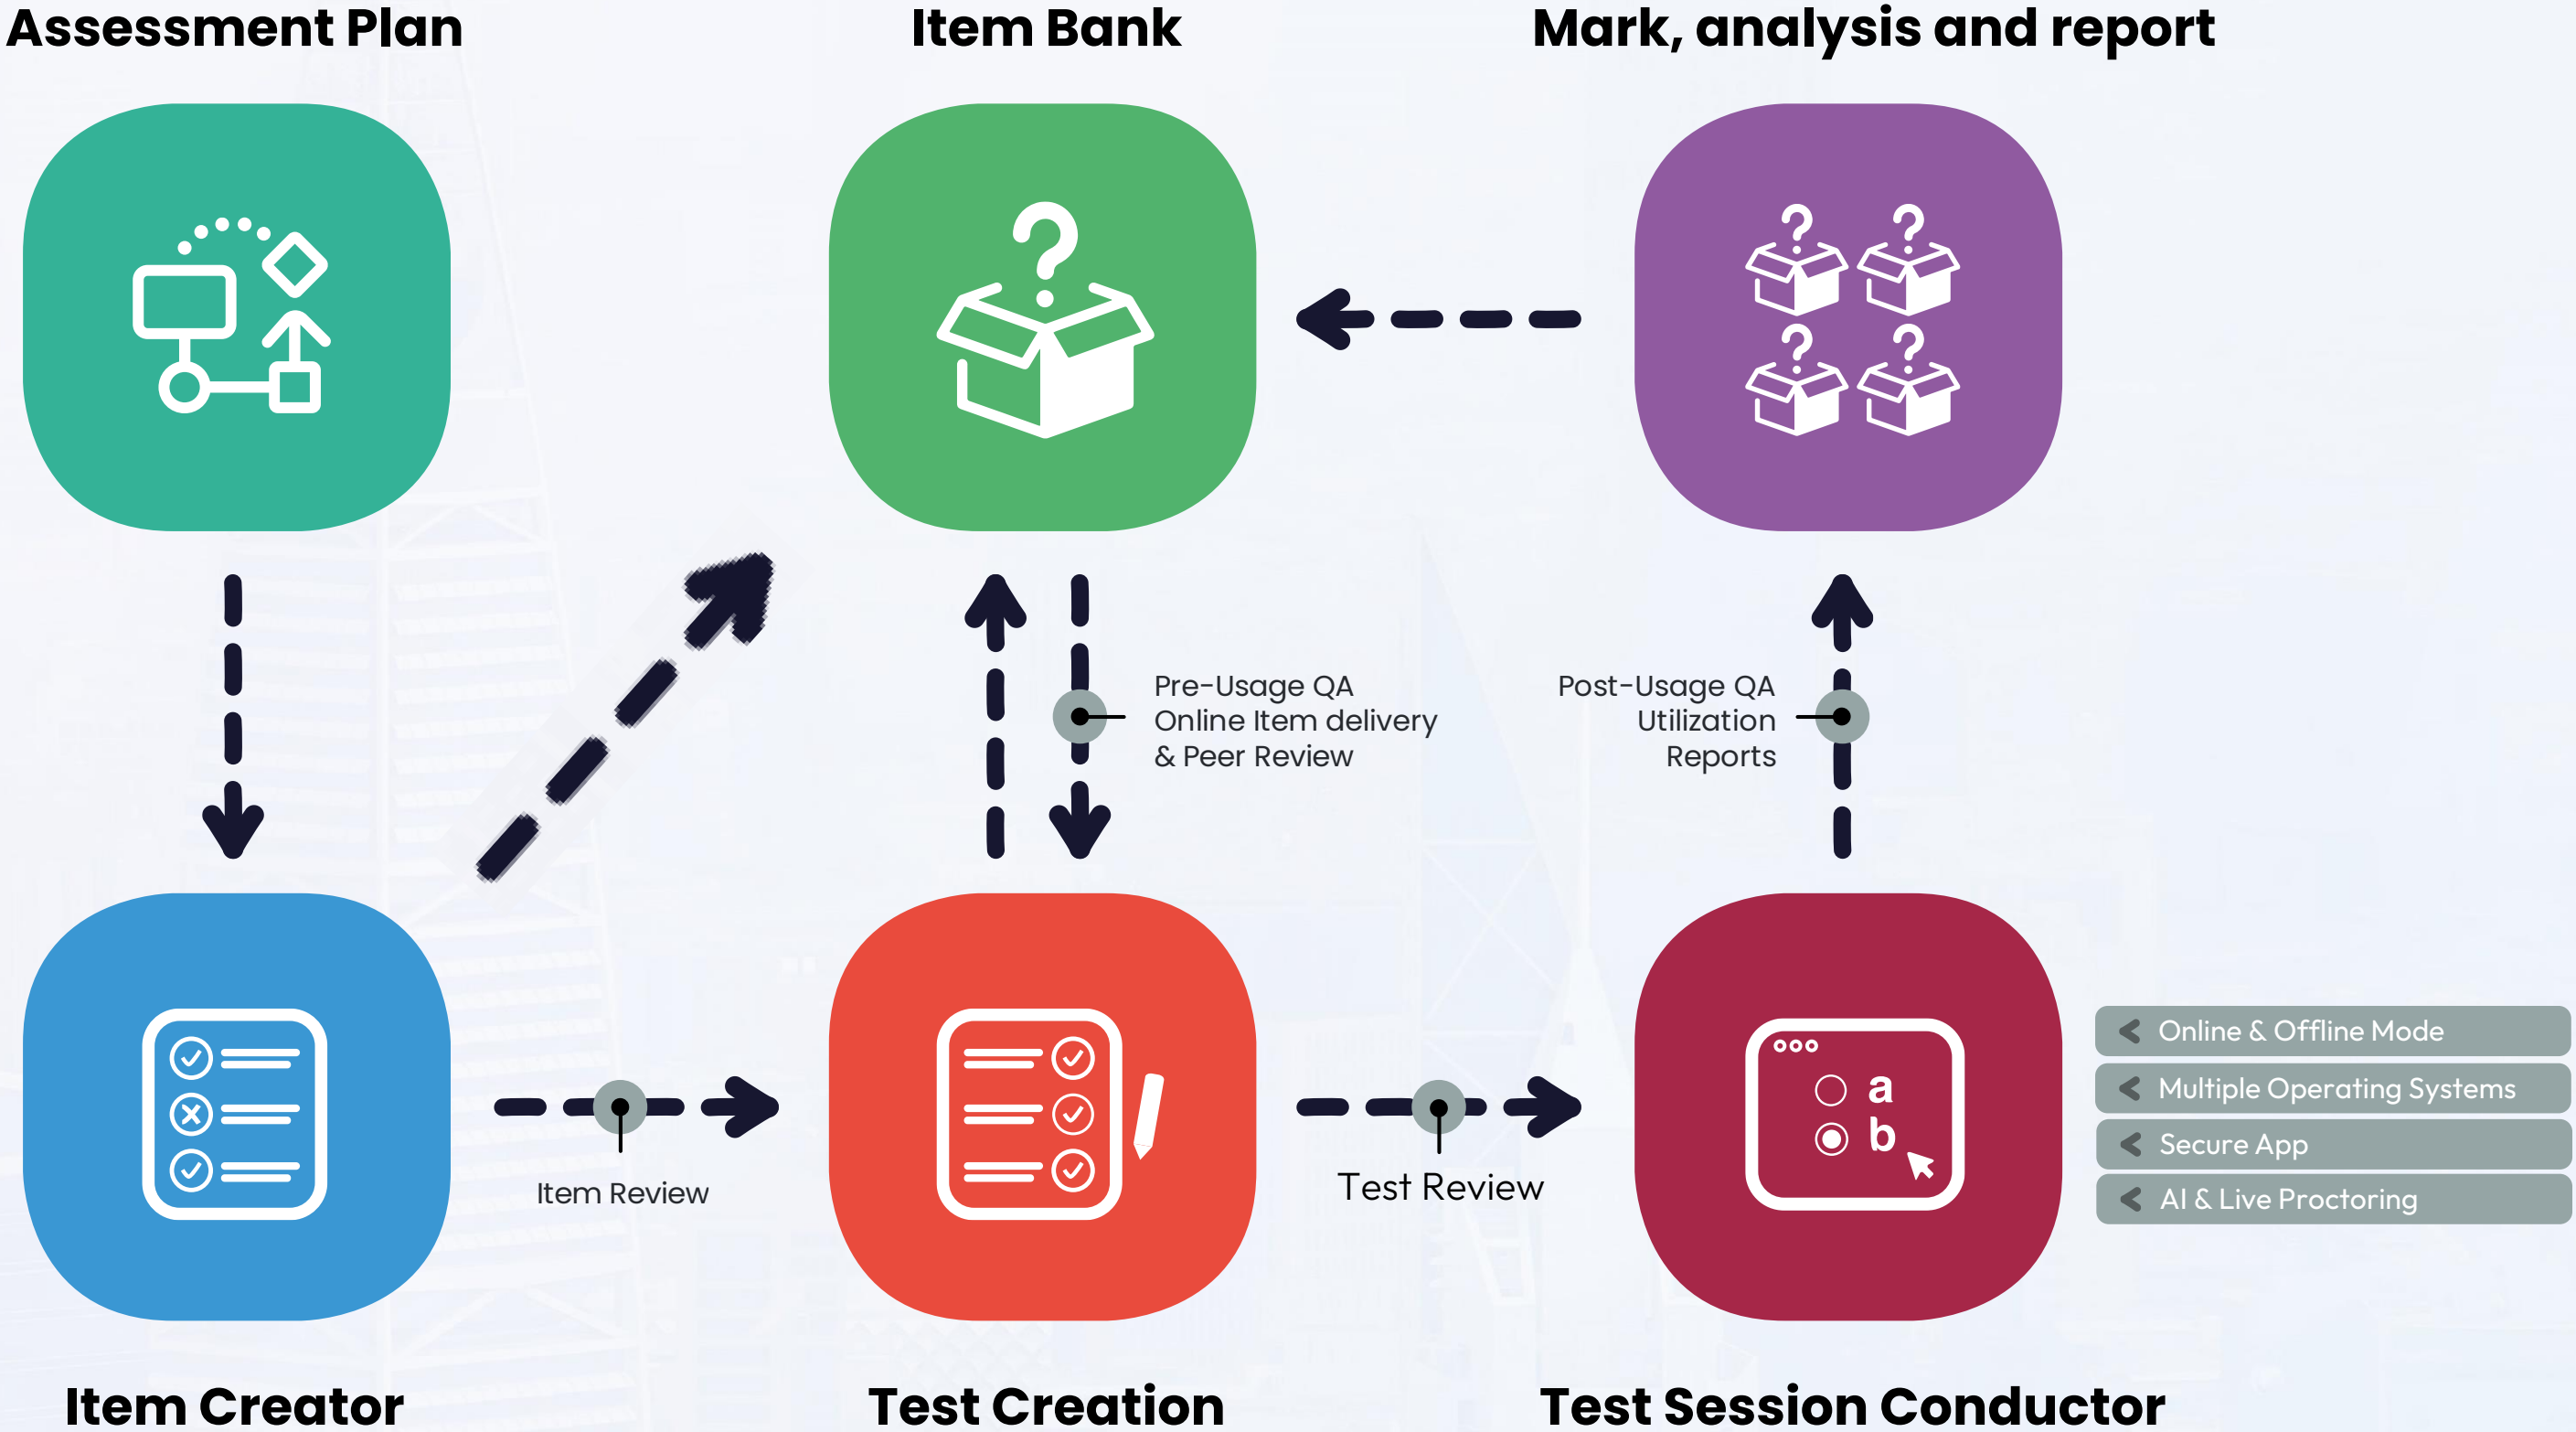

Security, Privacy & Confidentiality

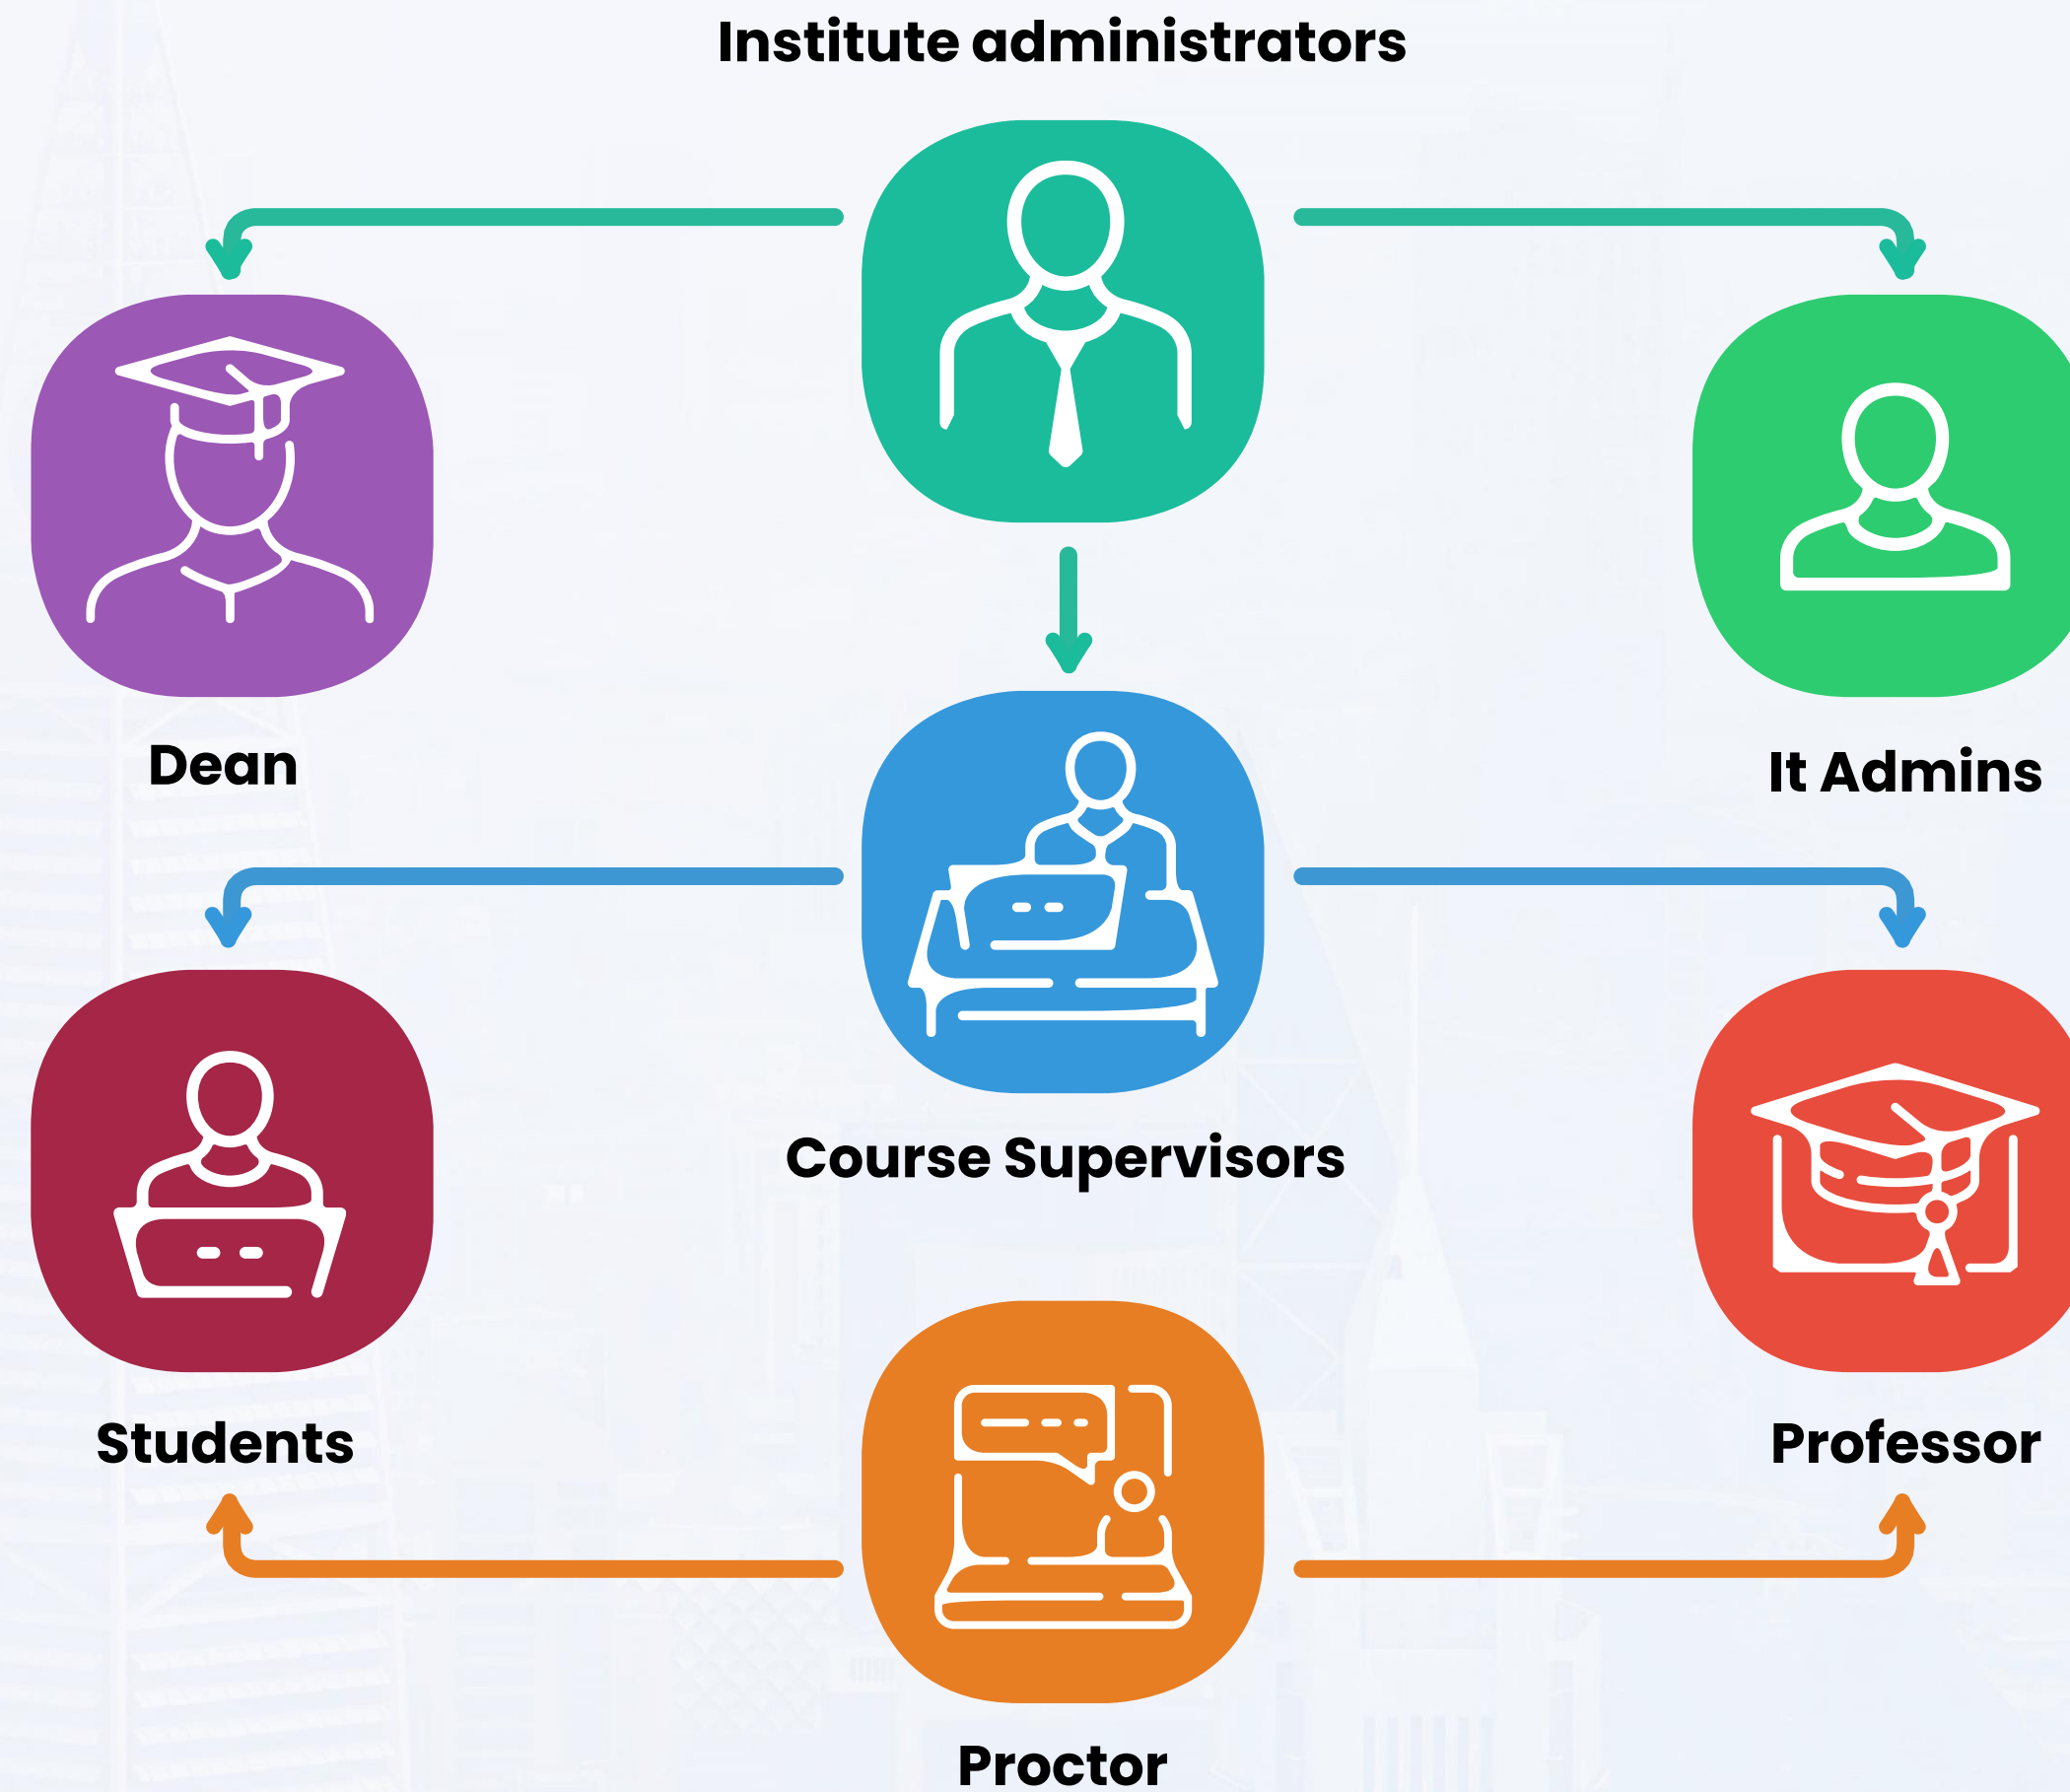

We prioritize the privacy and confidentiality of our customers' data within our assessment software. We have implemented stringent security measures and industry best practices to ensure the protection of sensitive information. Our software adheres to a comprehensive framework that governs data privacy, ensuring that personal and assessment data is handled with the utmost care.

QQ System Structure

Main Roles

And Others..

Main Roles

Setting Higher Rules

- Curriculum Outcomes
- Course Objectives
- Course Settings
- Multi-dimensional Mapping
- Assessment Settings & Rules

Professor building an item

- Directly from the system.
- or using templates and import these items later on.
- with NO Mapping.
- with Mapping.

Dean Rules

- Review
- Decision making

Student Taking Exam on

- (Windows) + web browser 
- (Windows) + Secure App 
- Android 
- iOS Device 

Course Supervisor Roles

- Build Exam Session
- Conduct the Exam
- Monitor the Exam
- Manage Results
- Track Reports

Proctoring

- Artificial Intelligence.
- Human proctors.
